

Adobe Photoshop Level 1

About this course

Master Adobe's flagship imaging application by learning expert techniques from professional designers in this hands-on course. Photoshop was pivotal to the birth of desktop publishing and computer-based image manipulation in the 1980s. In recent versions, the program has become both easier to use and significantly more powerful, putting it within reach of new users while remaining the tool of choice for serious graphics professionals working with print, web or video.

In this foundation course, we cover the basic aspects of the program including fundamental colour and tone adjustments, layer principals, the workspace, the History panel, file formats and more. Time will also be spent on basic colour theory and the important companion program, Adobe Bridge.

In all, this is a comprehensive course and students will find the subject matter covered in sufficient detail to progress to our Level 2 course, or undertake simple use of the program without further study.

About our courses

Our courses are delivered face-to-face in purpose-built training facilities. Each student has their own computer and is given personal attention to achieve their learning outcomes.

Courses may be taken "off the rack" at scheduled times or customised to your needs and delivered at your convenience.

What you get

Fearless courses are fully catered unless otherwise indicated. All courses include comprehensive courseware and, in most cases, a CD-ROM with worked examples, additional reference material and other goodies. All students receive a certificate at the completion of the course and we now offer 90 days phone and email support following the course to assist your learning.

You may also resit the course at any time in the future at no additional charge.

About us...

Fearless specialises in desktop training in graphic design, digital publishing, video editing and creative media. We are a national organisation with training facilities around Australia. Contact our office during business hours for further details.
